[Bivariate Data Analysis Common Core Algebra 1 Homework Answers](#)

Exercise #2: A school district was attempting to correlate the number of hours a student studies in a given week with their grade point average. They surveyed 8 students and found the following data.

Hours Studying	3	7	2	11	8	16	5	9
GPA	78	80	75	94	89	92	80	84

- (a) Find the equation for the line of best fit and the associated r -value. Round the linear coefficients to the nearest *tenth* and the r -value to the nearest *hundredth*. Then create a scatter plot with both the data and the line graphed. You do not need to reproduce that graph here unless your teacher asks you to.

- (b) What is the value of the residual associated with the data your answer.
